Putting Your Glasses in the Case

Place the glasses in the case with the right arm first. When the glasses are charging, the LED light will come on.

Battery status of Vue Glasses:

Charging:
Pulsing white light

Fully Charged:
Solid white light

Charge Your Vue

Battery status of Vue Glasses:

Charging: Orange
Fully Charged: Green

When fully charged, the case can be taken on-the-go and will recharge your glasses up to 3 times.

Plug in the USB.
Make sure the charging light turns on.

Turning on Your Glasses

Vue automatically turns on when you open the legs. Make sure as little hair as possible is between Vue's speakers and your skin.

The Touch Panel

The touch panel is located on the exterior of the right arm as shown above.

Single Tap

Single tap to answer phone calls or pause or play music.

Swipe

Swipe to switch to next or previous track.

Double Tap

Double tap to hear your fitness metrics or to hear the time of day.

Lens Care

If you ordered prescription lenses, check to make sure it is correct on your invoice.

Never place your glasses down lenses-first.

Keep your glasses in the case when not using them and only use a microfiber cloth to clean the lenses.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined

by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
